## **DETAILED ACTION**

### ***Continued Examination Under 37 CFR 1.114***

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on September 12, 2005 has been entered.

### **REASONS FOR ALLOWANCE**

2. The following is an examiner's statement of reasons for allowance: The claimed invention is drawn to two related, but different inventions. The first is a comparative genomic hybridization method for detection of measurement of particular genomic regions as in claim 45. This invention has been terminally disclaimed over the parent applications and is novel and unobvious since this applicant was the inventor of comparative genomic hybridization. The second is claim 68, in which simple hybridization is used and the novelty is the recognition that a sequence that is naturally at chromosome position 17q22-24 is amplified in breast cancers. The prior art of Lavialle no longer anticipates the claim in view of the amendment which requires that the sequence comprises a target that will hybridize with a 17q22-24 probe, thereby requiring the sequence that is normally present. The c-myc sequences of Lavialle are not normally at position 17q22-24. A further search of the art, looking at every gene

mapped in this region on the NCBI web site using the NCBI map viewer and pubmed, found amplified genes in breast cancer such as BCAS3 and ABC1 and genes associated with breast cancer such as BRIP1 and genes associated with other cancers such as LKB1. However, further search demonstrated that there were no disclosures of these genes in the prior art to the effective filing date of the current application. Therefore, the claimed invention is novel and unobvious over the prior art.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
